

Using XperienCentral

XperienCentral is a powerful content management system (CMS) with which you personalize your digital channels and make them relevant and consistent. The system is rich in functionalities that make it simple to generate new and personalized content and publish it across different websites and channels. This section describes how to add, manage and personalize content and is meant for casual users, editors and main editors. For information on how to configure and maintain XperienCentral's other functionalities, select a topic from the table of contents in the left pane of this help interface.
